## Fidesic AP for Automotive Services

*National car wash company gets tailored AP Automation to meet their specific needs.*

**M**ammoth Holdings is a national car wash company. After growing 800% in three years, Mammoth needed to merge its accounting and operations teams into a single system. The company also needed a solution to automate accounts payable that would integrate with their Microsoft Dynamics GP solution.

“We were desperately seeking a robust program to integrate with GP that would improve AP efficiency,” Mammoth Accounting Manager Brittany Blackmon.

### *Company Profile...*

- **Locations:** 65
- **ERP:** Microsoft Dynamics GP
- **Problem:** Needed payables automation, fast, to keep up with growth.
- **Specific Needs:** Streamlined Approvals, Audit Readiness, Access Controls, Multi-Location Processing

**We were desperately seeking a robust program to integrate with GP that would improve AP efficiency ”**

## **The Problem**

Prior to using Fidesic, Mammoth’s accounts payable process relied heavily on manual work and was consuming too much time and money. As the company grew, this process proved to be unsustainable. With Fidesic, the company was able to automate and improve efficiency across the AP process.

The company also wanted to merge the operations team and accounting team in a centralized platform to better manage expense allocation without having to allow all field personnel access to their Dynamics GP system.

“Our company has been on a huge growth trajectory in the last 3 years,” said Blackmon. “From 8 locations to now 65, we needed a program like Fidesic to sustain controls.”

After researching a variety of different automation software companies, they found Fidesic. Fidesic directly addressed their specific needs and offered features that no other accounting automation alternatives have. Most importantly, Fidesic is dedicated to service.

## The Fidesic Difference

Because Mammoth is in a niche industry, it has specific requirements. While Fidesic AP is the best automation solution for Dynamics GP on the market, what sets Fidesic apart for Mammoth is service. The team at Fidesic worked closely with the team at Mammoth throughout the implementation process to develop solutions that meet all of Mammoth's unique needs.

"Mammoth is most impressed by the dedication and willingness of the Fidesic team to listen to our feedback, as it relates to our specific industry, and assist in improving our overall experience through development phases," Blackmon said. "Knowing Fidesic genuinely cares that we are as efficient as possible and wants to see us succeed holds a lot of weight! More so nowadays when personal relationships can tend to fade."

# Key Benefits of Using Fidesic

**Invoice Capture/OCR** - Fully managed data capture services for streamlined invoice processing

**Invoice Routing and Approval** - Based on location and entity with exception based workflows

**Outsourced Check Fulfillment** - With immense growth, printing and mailing checks could be a full-time job on its own

**Fulfillment Flexibility** - Whether paper check, ACH or Credit Card, automate all your payments to all your vendors

**Audit-Ready Reporting** - Simplified internal and external audit processes with reports designed for your business

**“I would most definitely recommend Fidesic to any company that has a need to improve their overall AP efficiency”**

## Fidesic for Audit Readiness

With audit traceability, automated approver routing and simplified control over user access rights, Fidesic has helped Mammoth improve its auditing process.

“It has been a significant aide in every aspect to our day-to-day as well as our auditing process,” said Blackmon. “Fidesic provides the perfect amount of checks and balances from a reviewer/approver perspective. Although our company is currently seeking a new ERP company, we have made it clear that the integration with Fidesic is a must! The Fidesic team has been more than helpful in assisting us with preparing for this in order to continue our relationship.”

# Summary

- Mammoth Holdings is growing rapidly and needs a robust AP solution that integrates with GP and enables them to continue to expand and stay agile.
- They needed a solution to automate their accounts payable that could be tailored to meet their industry needs.
- Mammoth needed to grant AP access without granting ERP access. They also wanted to improve their auditing processes.
- Fidesic provided Mammoth with an end-to-end AP automation solution to meet each of their needs with ongoing services that exceeded expectations.

**The Fidesic team has been more than helpful.**
